

يناير ٢٠٢٠ – JAN 2020

FIFTY YEARS

- * 1955 – 1965: Civil engineer in construction of projects in several regions of the kingdom.
- * 1958 (1377H): Honored to be nominated as a “Member of the technical committee” appointed by H.M. king Saud, God bless his soul, to study and prepare the plan to renovate the roof of the “ Holy Ka’bah ” .
- * 1965 – 1967: D.G. of projects and advisor to H.E. Mr. Hassan Meshari, God bless his soul, Minister of agriculture and water.
- * 1967 – to date: More than 50 years serving the nation in the field of consulting engineering.

A MESSAGE FROM THE CHAIRMAN

The Kingdom of Saudi Arabia has accomplished remarkable achievements in the past five decades. It has expanded its industrial base, developed a modern transportation network, created modern housing and built health and educational facilities for millions of its people.

Obviously, timing is everything. I returned from the United States with an engineering education at the precise moment in our country's history when technical knowledge was vital need. However, without the stability, resources and equality of opportunity made possible by the Kingdom's leaders, this great potential for growth and development would never have become reality.

As the oldest and largest engineering and architectural firm within the Kingdom, Saudconsult stands ready to focus its talents wherever the needs and the opportunities present themselves. We are also reaching out beyond our borders to share our skill and experience with neighboring countries.

For Young Saudi Arab engineers and architects, Saudconsult offers the opportunity to help build a meaningful career in a successful firm. In this way, we will continue to expand our core of technological expertise that will serve the Kingdom of Saudi Arabia well into the twenty first century.

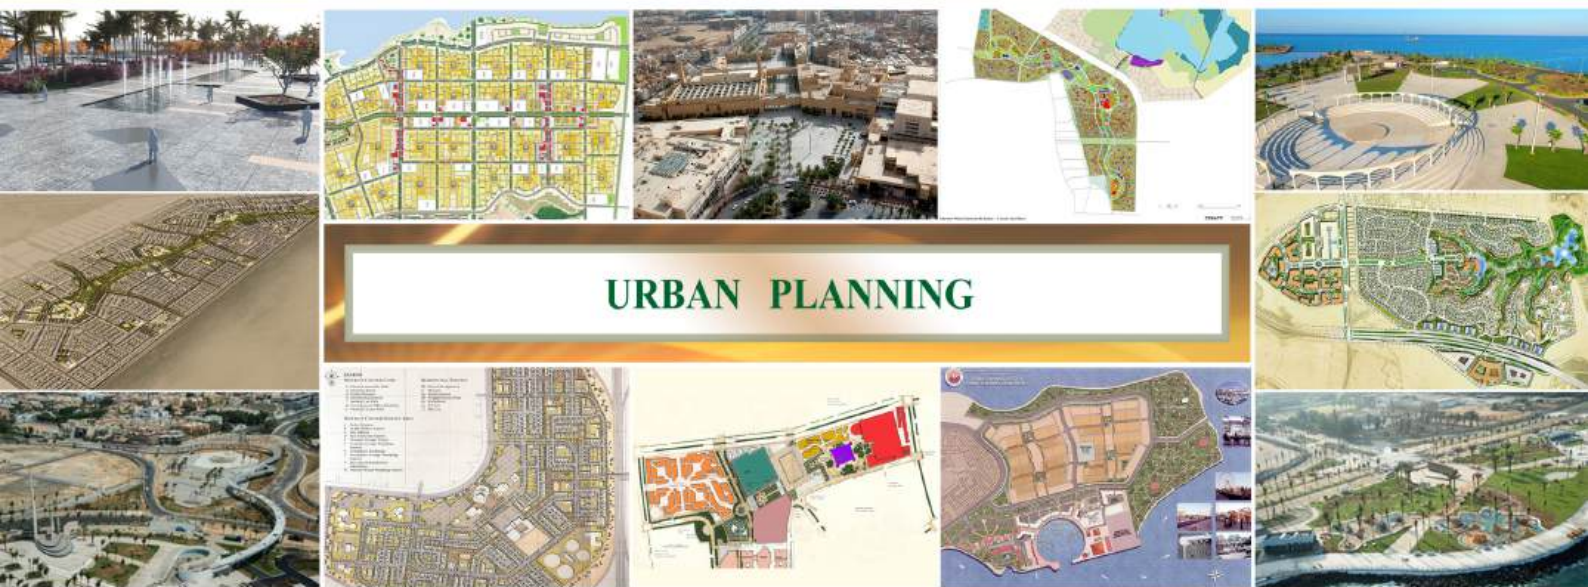

Engineer Dr. Tarek M.A. Shawaf
