

Engineering the Future Since 1965

ABOUT SAUDCONSULT

Founded in 1965, Saudi Consulting Services Company (SAUDCONSULT) is the first Saudi engineering consulting firm, established to work on strategic projects for the Kingdom in all disciplines. With over six decades of continuous operation, the firm has evolved into a multi-disciplinary architecture and engineering consultancy, delivering integrated services across the full project lifecycle. SAUDCONSULT provides all the services necessary to take a project from the initial feasibility study and conceptualization through detailed design/engineering, project management, construction supervision, procurement assistance, commissioning and finally operation and maintenance. It can also furnish each of these services individually, or assemble them in a combination to meet a specific set of needs.

Today, SAUDCONSULT operates with a substantial professional workforce comprising over 2800 highly qualified professionals, distributed across offices throughout the Kingdom and supported by international affiliates. This depth of expertise enables the firm to manage complex, large-scale projects efficiently while maintaining a strong understanding of local regulations, site conditions, and client requirements.

By combining advanced technical know-how, continuous engagement with evolving engineering technologies, and a long-standing commitment to quality, SAUDCONSULT has established itself as a trusted partner for government entities, authorities, and private-sector clients. The firm's enduring success is rooted in its ability to balance innovation with reliability, delivering engineering excellence that supports national development objectives while meeting the highest professional standards.

CHAIRMAN'S MESSAGE

Since our establishment in 1965, SAUDCONSULT has been committed to serving the Kingdom of Saudi Arabia through engineering excellence and professional integrity. Over the years, we have grown alongside the nation, contributing to landmark projects that support economic growth, urban development, and social progress.

As we look to the future, we will continue to expand our services within the Kingdom and internationally, while striving to achieve ever higher levels of quality, efficiency, and client satisfaction. Our commitment remains focused on delivering engineering services that meet the evolving needs of our clients and the communities we serve.

A key pillar of SAUDCONSULT's long-term success is our belief in human capital development. We will continue to invest in recruiting, training, and empowering young Saudi engineers, providing them with meaningful career opportunities and the skills required to contribute effectively to the nation's development.

For our clients, our objective is clear and unwavering: to provide the highest quality engineering services, delivered efficiently, economically, and within the shortest possible timeframes. This principle has guided Saudconsult for more than six decades and will continue to shape our direction in the years ahead.

Engr. Dr. Tarek M.A. Al Shawaf

FOUNDER & CHAIRMAN

Saudi Consulting Services Co. (SAUDCONSULT)

OUR JOURNEY AND MILESTONES FROM 1965 AND BEYOND

1965 : The Dawn of Leadership (Foundation)

The journey began at the hands of Dr. Tarek Mohammed Ali AlShawaf, with the establishment and opening of the SAUDCONSULT office in the Al-Malaz district of Riyadh. It became the first licensed engineering firm in the Kingdom of Saudi Arabia to work on strategic government projects in the road and water sectors, laying the very first foundation stone for the national engineering consultancy sector.

1970s – 1980s : Engineering National Connectivity

We drove national urban development through key contributions to the Kingdom's road networks, Saudi Electric Company projects, and the industrial cities of Jubail and Yanbu. Our impact also extends to strategic water desalination and transport projects that remain landmarks of national progress.

2000s - 2015 : Technological Transformation & Talent Empowerment

During this phase, we modernized our infrastructure, transitioning from AutoCAD to BIM as a national pioneer. We simultaneously focused on human capital by launching a strategic initiative to recruit Saudi female engineers and establishing university internship programs to train the next generation of national talent generation of national talent.

1990s - 2000s : Comprehensive Services and Human Impact

We expanded our expertise into vital sectors such as health, education, and industry, providing integrated engineering services from concept to project management and execution. Our portfolio features landmark projects, including major university hospitals, educational complexes, the Riyadh Courts Complex, and the King Fahd National Library.

2015 - 2025 : Vision Partnership & Transitional Projects

In alignment with Saudi Vision 2030, we integrated AI into our engineering services to boost accuracy and efficiency, we established the Academy to attract and recruit Saudi talent and to share 60 years of expertise with our professionals and national talent. As a pivotal technical partner, we are actively shaping the future of Saudi Arabia's mega projects, including Diriyah, KAFC, and the development of the nation's new urban centers.

2030 - The Future & Sustainability Leadership

We continue our commitment to applying the latest global practices and technology in engineering services, focusing on sustainable engineering innovation that serves the Kingdom's aspirations, ensuring we remain the premier consultancy choice in the region.

OUR VISION

To continue being the leading Saudi engineering and architectural consultancy, recognized for delivering high-quality, efficient, and reliable engineering services that support national development and extend our presence both within the kingdom and internationally.

OUR MISSION

To provide comprehensive engineering and consultancy services that address the full lifecycle of a project, delivering these services with the highest standards of quality, while ensuring cost efficiency and timely project delivery, in line with client requirements and national priorities.

OUR VALUES

Quality

We consistently strive to achieve the highest degree of quality in all our services, ensuring technical excellence and long-term value for our clients.

Client Satisfaction

Our approach is centered on understanding and fulfilling client needs by delivering engineering services that are efficient, practical, and responsive.

Integrity

We conduct our work with honesty, responsibility, and respect, building long-standing relationships based on trust and reliability.

Excellence & Innovation

We are equipped to handle even the most complex projects, through continuous engagement with advanced technologies and modern engineering practices.

Talent Development

We are committed to supporting the Kingdom's development by investing in human capital, particularly through the recruitment, training, and development of young Saudi engineers.

HIGHLIGHTS IN NUMBERS

1st National Pioneer

The first licensed Saudi engineering consultancy firm, setting the standard for the entire local industry.

60+ Years

Of continuous professional experience in engineering and consultancy services.

2,800+ Personnel

A multi-disciplinary workforce of engineers, architects, technicians, and support staff distributed across offices.

3500+ Projects

Delivered ranging from local landmarks to complex projects, consistently setting the standard for engineering excellence.

USD 230+ Billion

Total cumulative value of construction costs of completed projects delivered, reflecting the scale of its portfolio.

6 Offices (KSA)

Headquartered in Riyadh, with a comprehensive presence across the Kingdom.

2 International Offices

International presence through offices in Cairo (Misrconsult) and Manama, Bahrain, supporting regional and international projects, to further strengthen our international reach.

100+ International Projects

Engineering and consultancy services delivered across the Middle East, Africa, and Asia, exporting Saudi expertise to the global stage.

Overview

Location:

King Mohammed V Street,
Al Sulaymaniyah District,
Riyadh

Status:

Headquarters
of SAUDCONSULT

Built-Up Area:

Over 15,500 m²

Building Configuration:

Ground Floor +
Mezzanine + 2 Floors

Facilities & Amenities

- 5 Conference Rooms
- 2 BIM Laboratories
- 1 Large Auditorium
- All spaces equipped with modern audio-visual facilities

Office Planning Philosophy

- Co-location of related functions to enhance coordination
- Shared workspaces to encourage collaboration
- Modular furniture systems enabling flexible office layouts

ENGINEERING DESIGN

Engineering Design at SAUDCONSULT represents the intersection of creative vision and technical feasibility. We adopt an integrated approach that harmonizes our multidisciplinary expertise to deliver innovative services that exceed expectations, with an absolute focus on efficiency and sustainability. By leveraging the latest modeling technologies and AI, we transform complex engineering challenges in the Energy, Transportation, and Infrastructure sectors into precise blueprints that ensure project success from day one.

KEY DESIGN SERVICES

Planning & Site Development

Master planning, urban design, and comprehensive site development for large-scale projects.

Building Engineering

Integrated architectural and structural engineering for institutional, healthcare, and commercial buildings.

Infrastructure

Roads, grading, stormwater, potable water, wastewater, irrigation, electrical power, and telecom networks.

Transportation Engineering

Roads, highways, tunnels, bridges, interchanges, pedestrian bridges, and traffic systems.

Defense & Aviation

Specialized engineering services for strategic defense facilities and aviation infrastructure.

Oil & Gas / Industrial

Design and engineering for process infrastructure and industrial developments.

Environmental & Sustainability

Impact assessments and sustainable design services aligned with Saudi Vision 2030.

BIM / GIS Services

Advanced Building Information Modeling and Geospatial Analysis for integrated project delivery.

Electrical Power & Industrial Design

Power plants, substations, transmission lines, industrial utilities, and process infrastructure.

CONSTRUCTION SUPERVISION

Construction Supervision is the critical bridge between design excellence and final delivery. We deploy specialized, experienced site teams to manage, inspect, and verify all construction activities. Our role extends beyond quality control to encompass proactive risk management, adherence to strict schedule and budget controls, and meticulous coordination among all contractors and stakeholders. We are the client's eyes on the ground, ensuring every detail reflects the original, ambitious vision.

KEY SUPERVISION SERVICES

Planning & Site Development

Master planning, urban design, and comprehensive site development for large-scale projects.

Building Engineering

Integrated architectural and structural engineering for institutional, healthcare, and commercial buildings.

Infrastructure

Roads, grading, stormwater, potable water, wastewater, irrigation, electrical power, and telecom networks.

Transportation Engineering

Roads, highways, tunnels, bridges, interchanges, pedestrian bridges, and traffic systems.

Defense & Aviation

Specialized engineering services for strategic defense facilities and aviation infrastructure.

Oil & Gas / Industrial

Design and engineering for process infrastructure and industrial developments.

Electrical Power & Industrial Design

Power plants, substations, transmission lines, industrial utilities, and process infrastructure.

Technical Support

Dedicated engineering services to provide on-site services and technical guidance.

Managing and Supervising Operation and Maintenance (O&M) Programs

Ensuring long-term asset performance through strategic O&M oversight.

PROJECT & PROGRAM MANAGEMENT (PMO/PMC)

SAUDCONSULT delivers integrated Program and Project Management services from inception to final delivery. Through structured governance and disciplined execution, we ensure effective control over quality, cost, and schedule, enabling the successful delivery of complex national initiatives in line with international best practices.

KEY PMO / PMC SERVICES

Program Management & Strategic Planning

Developing integrated program roadmaps, phasing strategies, and aligned schedules to ensure all constituent projects support overarching delivery milestones and strategic objectives.

Design Management

Leading and coordinating the multi-disciplinary design process to ensure total integration between architectural, structural, and MEP services, while focusing on value engineering and technical compliance.

Management of Operations and Maintenance (O&M)

Providing integrated O&M management services to ensure asset sustainability, preventive maintenance planning, and energy efficiency optimization for long-term operational excellence.

Total Cost, Schedule & Risk Management

Implementing disciplined financial control, forecasting, and proactive risk mitigation strategies to protect project delivery and minimize disruptions.

Project Management & Multi-Project Delivery

Managing individual projects from initiation to close-out through structured planning and control, ensuring delivery in accordance with defined scope, budgets, and quality standards.

Construction Management

Providing site-based management services to control quality, progress, and safety, bridging the gap between the technical office and field execution through digital monitoring.

Centralized Resource & Stakeholder Management

Optimizing the deployment of specialist expertise and managing coordination among public authorities, consultants, and contractors to ensure seamless execution.

SPECIALIZED STUDIES

Specialized Studies are the strategic groundwork that guarantees project viability and success. We provide clients with the deep technical data, market intelligence, and comprehensive risk analysis required to make informed decisions before significant capital commitment. Our pre-design services ensure the project's scope is robust, compliant, and optimized for maximum return on investment.

KEY ADVISORY & STUDY SERVICES

Hydrological Studies

Analyzing flood risks and designing protection and stormwater systems.

Environmental Impact

Comprehensive studies to ensure sustainability and environmental compliance.

Value Engineering

Reviewing designs to enhance quality and reduce OPEX and CAPEX.

Geotechnical Studies

Analyzing site soil to ensure the structural integrity of mega-facilities.

BIM Modeling

Utilizing advanced digital technologies to enhance design and execution precision.

Technical Feasibility Studies

Integrated technical assessment of projects before inception to ensure investment success.

Excellence in Integrated Studies Approach

We believe that project success is inseparable from the quality of preliminary studies. Therefore, we adopt an integrated approach connecting field surveys, digital analysis, and accumulated engineering expertise, ensuring a seamless project transition from planning to tangible reality.

INNOVATION VISION

SAUDCONSULT's approach to innovation is grounded in the practical application of advanced engineering technologies to enhance project quality, coordination, efficiency, and reliability. Since its early involvement in national development projects, the firm has continuously evolved by integrating modern tools, systems, and methodologies into its engineering and consultancy services.

Innovation at SAUDCONSULT is a structured and deliberate progression, focused on adopting proven technologies that improve design accuracy, interdisciplinary coordination, data management, and informed decision-making across the project lifecycle.

INNOVATION ROADMAP

SAUDCONSULT's innovation roadmap is defined through the progressive integration of digital and technical capabilities across design, supervision, and management functions:

Digital Design Enablement

Adoption of advanced engineering software and coordinated digital workflows to support complex, multi-disciplinary projects.

Building Information Modeling (BIM)

Deployment of BIM laboratories to enhance coordination, clash detection, and integrated design across disciplines.

Data-Driven Planning & Analysis

Use of GIS platforms, surveys, and digital databases to support regional planning, infrastructure design, and evidence-based decision-making.

Technology-Supported Supervision

Application of modern digital tools to support construction supervision, reporting, monitoring, and quality control.

INTEGRATION OF SYSTEMS FOR AUTOMATION

SAUDCONSULT delivers integrated engineering solutions by coordinating multiple systems within a unified project framework. This approach enables automation across infrastructure, buildings, utilities, and transportation systems, enhancing operational efficiency, safety, and long-term performance.

The firm's experience spans the integration of electrical, mechanical, ICT, control, and monitoring systems, ensuring seamless interoperability between physical infrastructure and digital control platforms.

AUTOMATED & SMART SYSTEMS COVERAGE

SCADA & Control Systems

Integration of supervisory control and monitoring systems for utilities, power generation, and infrastructure networks.

ICT & Telecommunications Systems

Voice, data, wireless networks, and integrated communication platforms supporting operational continuity.

Building Management Systems (BMS)

Centralized monitoring and control of building services to improve efficiency and operational performance.

Security & Life Safety Systems

Fire alarm, access control, public address, and surveillance systems integrated within building and infrastructure projects.

Smart Infrastructure & Transport Systems

Automated systems supporting roads, tunnels, bridges, and urban mobility infrastructure.

Data Centers & Command Centers

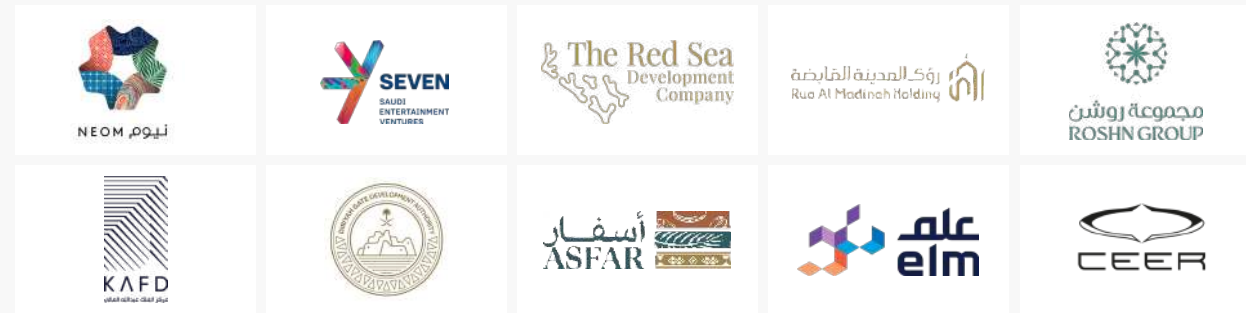

Design review and system integration for Tier-3 data centers, command and control facilities.

SAUDIZATION AND TALENT DEVELOPMENT

LOCAL CONTENT ENGAGEMENT & ACHIEVEMENTS

SAUDCONSULT Academy – Training Ending with Employment

Overview : To discover and develop top talent and integrate distinguished individuals into SAUDCONSULT's departments through a structured three-stage program.

SAUDCONSULT ACADEMY – TRAINING & EMPLOYMENT PROGRAMS

PROGRAM STRUCTURE

Discovering and integrating top talent into company departments through two structured processes:

Training Ending with Employment

SAUDCONSULT and the Technical College in Riyadh have a formal agreement to employ trainees upon successful completion of training programs.

Trainees work on live projects across multiple roles, including:

- CAD Technicians
- Assistant Managers
- Secretariat
- Receptionists

Summer Training Program (Co-Op)

In collaboration with leading universities:

- King Saud University
- King Fahd University of Petroleum & Minerals
- King Abdulaziz University
- Taibah University
- King Faisal University
- Jazan University
- Qassim University
- Princess Nourah University
- University of Prince Mughrin
- Prince Sultan University
- Dar Al-Uloom University

Program Objectives

- Bridge academic learning with real-world project experience
- Enable universities to evaluate students through structured performance reports
- Prepare students for professional careers through practical exposure
- Develop problem-solving, decision-making, and innovative thinking skills

SAUDCONSULT PARK – OUTDOOR COMMUNITY SPACE

Supporting Employee Wellbeing & Sustainable Work Environment.

SAUDCONSULT Park is an outdoor landscaped space developed to enhance employee wellbeing, promote interaction, and support a healthy work environment.

Key Highlights:

- Landscaped green areas
- Native tree plantation
- Shaded seating spaces
- Environmentally integrated design
- Promotes relaxation and informal collaboration

This initiative reflects SAUDCONSULT's commitment to:

- Employee wellbeing
- Environmental enhancement
- Sustainable workplace practices
- Social responsibility
